Question List

Reference #	Question
U1	Please comment on how well the activities, readings, lectures, and assignments helped you learn in this course.
U2	Please identify what you perceive to be the greatest strengths of this instructor's teaching.
U3	Please identify areas where this instructor could improve his/her teaching.

Student Responses

Reference #	Student #	Response
U1	1	I felt I learned best from the homework and quizzes. The most difficult part was applying lectures to hw which is why it took long. I really enjoyed the way the instructor made the lectures interesting and the material was well organized. However it was still difficult to complete hw.
U1	3	The lectures had plenty of examples that helped explain the material
U1	4	helpful.
U1	5	homework was very helpful for understanding the material and preparing you for tests.
U1	6	The power points were taught in a way that anyone can learn from it. There was images for visual learners and worked out problems.
U1	7	Very well.
U1	9	very well
U2	1	The instructor did a great job of spending his own time to work with students when they needed help. He also was able to answer many questions thrown out him throughout the lecture, even if they were random.
U2	2	Always looking to help the students
U2	3	Best teacher ever, always available for extra help, keeps class engaged
U2	4	relatable. helpful.
U2	5	-uses lots of examples -very clear -tests and quizzes are very similar to homework/class lectures, makes it easy to know what to study before exams.
U2	6	He was very organized which made it easier to understand the concepts. He also uses lots of examples before we leave class on each chapter so we have a better understanding of everything.
U2	7	Clear instruction, fair grading, and appropriate pace for the material.
U2	8	Effective communication of tricky subject matter and availability.
U2	9	fair, lots of examples, organized
U2	10	I thought he did a great job of being available to his students and was always willing to help.
U3	1	There were times I felt the lecture was difficult to apply to the homework. We were given many examples throughout the lecture but didn't always understand how to apply them to the hw questions that often required a calculator.
U3	2	Maybe explaining things a little more thoroughly
U3	3	None
U3	4	be more availability towards end next time. dont cut office hours
U3	5	-Overall really good, sometimes I was not sure what the formula you would want to do your calculation with was. Often wrote a large version of the formula and then simplified it, but this could sometimes be confusing.
U3	6	Nothing to improve on. Enjoyed the class!
U3	7	None it was great!
U3	8	Could be a little more engaging, but also it's math and a lot of the students in class were taking it as a requirement.
U3	9	none
U3	10	I think that he could stray away from going to in depth in certain areas. For example, at times he would go into calculus when many people in the class have not taken a calculus class. It would confuse most of the students when he did this.
